

What Can I Ask ChatGPT?

1 Choose a route

Pick what you'd like help with.

2 Copy it or say it

Type it in, or say it aloud with ChatGPT Voice.

3 Keep talking

Question, clarify or change direction in your own words.

● Start here: one line for each route

Talk something through

"I need to think something through. Can I talk it out with you?"

Show it something

"Have a look at this with me. What do you notice first?"

Check what's current

"Can you check the web for the latest information for my location and date?"

Make a decision

"I'm trying to choose between two options. Ask me what matters most before you compare them."

Work through an idea

"Before you answer, ask me the questions you need so you understand what I'm trying to do."

Help me while I'm doing something

"I'm doing this now. I'll tell you what I see as I go. Help me one step at a time."

I don't know what to ask

"I'm not sure what to ask. Help me work out a useful question by asking me one question at a time."

● Not the answer you needed?

- **Not what you meant:** "Hang on, that's not what I meant. Let me explain it another way."
- **Too complicated:** "Give me the simple version."
- **Missing details:** "Before you try again, ask me the questions you need."
- **Want another way:** "Give me a different approach."
- **Not sure it's right:** "Where did that information come from?"
- **Gone off track:** "Let's go back to the beginning."

● What should I say next?

- "Can you explain that more simply?"
- "Give me an example."
- "What am I missing?"
- "Ask me one question at a time."
- "Can you compare those options?"
- "What should I check before I decide?"
- "Is that still current?"
- "Can you summarise what we've decided?"

Add a little context

Who it's for, where you are and what you'd like at the end.

You're in charge

Interrupt, disagree or redirect at any time. It won't mind.

Check what matters

For health, money or legal questions, confirm with a trusted source.

"You don't need the perfect prompt. You need a useful place to begin."
